

FRIGOTECH S.R.L.' S POLICY

Frigotech s.r.l. has always been engaged to realize its own products with high standard quality level also respecting the environment, in order to guarantee the satisfaction of the customers and to contribute to a sustainable development.

According to this reason Frigotech s.r.l. undertakes to steer its choices to the environmental endurableness and aims to adopt a philosophy of company growth which enables to reach the pollution reduction and the continuous betterment of the quality product together with the services, thus involving, as much as possible, its own financial and human resources.

Being on the same wave-length as the movements that wish to introduce forms of sustainable development, Frigotech immediately complied with the project of "Distretto delle Valli Bresciane" born in 2003, which has the target of bettering the environmental managing in the district through the promotion of systems for the ambient and through the pursuit of continuous and common improvement targets.

Frigotech s.r.l., according to the indications which emerged from the amelioration program of the District and together with the evaluation of its own significant aspects, has decided to reach:

- ✚ To minimize the environmental impacts especially regarding the managing of the water and the emissions in the atmosphere
- ✚ The Customer satisfaction and the ambient safeguard
- ✚ The optimization of the production processes in order to guarantee the product quality and the efficiency in the use of the resources
- ✚ The participation of the staff, and of the own suppliers, to develop a respectful behaviour towards the themes of the ambient in order to guarantee a common attention at the quality of the products which will be delivered to the customers
- ✚ The steady respect of the environmental enforceable set of rules
- ✚ The continuous staff training which works for Frigotech s.r.l. so that everybody can be aware of the impact of the production cycle on the ambient and of the importance of the production according to the "quality"
- ✚ The staff involving in order to achieve the goals of improvement which have been defined by the Managing Direction

In order to make sharable and transparent the inspiring principles of the company's policy, Frigotech s.r.l. engages itself to divulge them both internally and externally. With the aim of bettering further on the managing system – based with reference to UNI EN ISO 9001 and 14001 – Frigotech declares itself available to welcome eventual evaluations and suggestions which can be of help to the pursuit of a steady improvement.

Lumezzane, 27th July 2007

The Managing Direction
